## GHSP Announces Debut of UV-C Technology Brand grēnlite™ at CES

**GRAND HAVEN, Mich. (Jan. 6, 2020)** – [GHSP](#), a global supplier in the automotive and high-end appliance industries, today announced that grēnlite™, the company's new UV-C technology brand, will make its debut at CES.

The grēnlite™ line of programmable, intelligent UV-C products recognizes when a surface or environment has been used and automatically begins treatment for harmful pathogens using UV-C light. The systems have a variety of health, safety, and connectivity applications, including the emergency, commercial, mass transit, and shared mobility spaces. grēnlite™ works to combat the presence of day-to-day bacteria often found in these environments that can lead to illnesses like influenza or the common cold.\*

At CES, GHSP will display a grēnlite™ system in a Ford Transit simulating a ride share vehicle.

“As mass transit, shared mobility, and mobile health care expand and advance, there is a growing need for a safe and efficient way to remove bacteria from shared surfaces such as handles, railings, and seats,” said Marc Smeyers, GHSP's chief technology officer. “grēnlite™ provides next-level hybrid UV-C technology and is focused on developing ways to make our shared world cleaner and safer.”

grēnlite™ utilizes industry-leading UV Angel® technology which features a patented system of integrated smart sensors that detect when a vehicle is unoccupied and automatically emits a dose of UV-C light that treats interior surfaces and the air in the vehicle. After each surface interaction, the sensors determine when it is necessary to initiate the next cleaning cycle. The system has been designed to withstand crash test requirements and is virtually maintenance free.

GHSP will be located at booth 3111 in the North Hall of the Las Vegas Convention Center.

### About GHSP

GHSP is a privately-owned company based in Grand Haven, Mich., that specializes in the design and manufacturing of innovative control systems and technology solutions primarily for the automobile and high-end appliance industries. Founded in 1924, GHSP has locations in North America, Europe and Asia. GHSP is a portfolio company within JSJ Corporation, a growth firm with global manufacturing, distribution and service businesses that focus on highly technical skills to deliver engineered solutions. Learn more at [GHSP.com](#) and [www.JSJcorp.com](#). grēnlite™ is a trademark of GHSP.

**About UV Angel®**

UV Angel® uses years of advanced research and development in ultraviolet light to make the environments around us measurably cleaner and safer by eliminating harmful pathogens. Fully automated, patented and proven safe, the company's UV-C technology monitors and cleans the surfaces we touch and the air we breathe. UV Angel®'s technology is complemented by a proprietary data analytics platform that delivers critical insights and strategic advantages to leaders in healthcare, food service, corporate, education and many more industries. UV Angel® is a registered trademark of UV Partners, Inc.
